CYBER MEMO

THE NEWS

The Township of Wentworth has taken up the “Dandelion Challenge”!

The month of May raises awareness of the importance of pollinating insects. By reducing the amount of grass cut on its territory, the Municipality aims to improve its environmental practices to offer more sustainable areas of biodiversity, and thus support the “Dandelion Challenge” movement. These measures offer nectar and pollen to bees, butterflies and bumblebees!

Back to the Waste Pick-Up Race!

Once again this year, the Waste Pick-Up Race was a real success. Thanks to everyone who took part in this Earth Day event!

Earlier a competition was launched and we are pleased to announce that Megan Robinson's family won the 4 day passes to the Lac Beattie Nature Park.

Les trésors du Dôme

The Ecocentre resource center officially becomes a non-profit organization!

The mission of *Les trésors du Dôme* is to reduce our environmental footprint and provide the public with low-cost items. To do this, they collect objects that can be recycled, giving them a second life for the benefit of the community. They collaborate with other community or governmental organizations by donating objects to the underprivileged or disaster-stricken. Finally, their goal is to reinvest the revenues generated in the community through various social, economic or environmental projects.

A first general meeting for the founding of the organization will be held on June 7, 2024 at 6:30 p.m. at 2 ch. Cambria, Gore. Please confirm your attendance by e-mail: tresorsdudome@gmail.com

Fire danger is increasing !

For safety reasons, the Township of Wentworth has put back its prevention signs located at all entry points to the territory. These signs indicate the current fire risk level.

Recently, the Government of Quebec designed a guide to support people during and after a forest fire threatening their property. Check it out to find out what to do if flames or smoke affect your area. You will also find instructions and recommendations to ensure the sustainability of your home.

Work required by the Hydro-Québec team

Over the coming months, Hydro-Québec will carry out vegetation control work in different sectors of the municipality.

The required work involves deforestation, cutting branches and felling trees of species not compatible with the electrical network or at risk of falling on the wires during weather events.
